Dear Mr. Nance,

I am the Aerosol Spray Trainer for the National Parks Service Seasonal Park Ranger Academy at Colorado Northwestern Community College in Rangely, CO. One of only 9 NPS academies in the USA.

The ASR training requires a full face exposure of OC for the OC certification as well as extensive lecture and tactical skills. Exposure was a full one second burst of ballistic stream at 10 feet, using a 5M SHU 2% spray.

For the exposure decontamination we used the Sabre Cleanse/Soothe products and the results I had were extraordinary. I sprayed and Decontaminated 18 people to full function decontamination in 1hr 15 minutes....total !! By any standard quite remarkable.

I used Sabre Cleanse/Soothe in combination with my 6 person water decon station (pvc pipe configuration with soft water sprayers) and 2 floor fans. The students experienced -0- reactivation when showering after the exposure and -0- second day symptoms consistent with OC exposure.

The Academy and all students were very pleased with results, particularly those with past OC exposure experience.

Well done on an excellent Product!

Chet Zajac  
NPS Control Tactics Instructor  
CNCC, Rangely, CO
