SABRE® HPLC GUARANTEE AND ISO CERTIFICATION

Security Equipment Corporation's Aerosol Projectors set the industry standard.

Through extensive testing and internal quality control Security Equipment Corporation's (SEC), SABRE® and SABRE Red® aerosol projectors proudly promote its High Performance Liquid Chromatography (HPLC) laboratory testing. Confirmed via The University of Utah's extensive OC (Oleoresin Capsicum) test results, appearing in the Journal of Forensic Sciences, pepper sprays have been proven to fail 30% of the time due to inconsistent heat levels! Due to SEC's in-house HPLC laboratory, SABRE products have been confirmed to never have failure dues to heat level inconsistencies. To achieve this level of quality and to ensure consistency, SEC tests each batch via its in-house labs and also by performing frequent independent testing. As a result, SABRE provides the most consistent level of pungency possible to further increase safety of SABRE users.

Chromtec, an independent testing laboratory and clearinghouse, has stated, "We're very impressed with Security Equipment Corporations testing facility and commitment to HPLC technology. Their state-of-the-art laboratory increases the reliability and effectiveness of SABRE products." SEC is the only defense spray manufacturer that has an in-house HPLC laboratory.

To demonstrate SABRE product quality control to its customers Security Equipment Corporation has successfully completed the ISO 9001:2000 Certification process. The certification process enhances SEC credibility through product consistency, quality and overall organizational performance. The International Standard Organization (ISO) was founded to develop a standard set of manufacturing, trade and communication standards, which is now the international accepted network of standards throughout the world. Mr. David Nance, SEC's Vice President of Sales and Marketing states, "SEC's ISO 9001:2000 Certification ensures our customers total satisfaction of our manufacturing quality. It is the premier quality accreditation and we are very happy to meet its standards."

Since 1975 Security Equipment Corporation has produced the safest and most effective line of defense spray products: Branded as SABRE, SABRE Red and FRONTIERSMAN, customers are offered the finest defense spray possible with one thought in mind: When a life is at stake, our products must be effective.
