Mr. David Nance,

I am writing to you regarding Sabre Red 10% OC containing 1.33% Major Capsaicinoids.

I recently attended an Intermediate Use of Force Instructor course through Red Man Training Institute from February 23-27, 2004. During one of the drills we were to receive a Level one Chemical Agent contamination from Sabre Red and then complete the use-of-force drill. I have completed drills similar to this after being contaminated with other products. The effects from Sabre Red were immediate and totally devastating. I have been contaminated over 150 times, and have been exposed to just about everything on the market. I can personally attest to the effectiveness of Sabre Red, and due to my first hand experience with your product I can make the following statement with confidence. Sabre Red was the most devastatingly effective chemical agent I have had had the unfortunate opportunity to experience!

Experience is the best teacher, and experiencing Sabre Red has provided me with an exceptional faith in your product. I do not pay my Officers to lose, and Sabre Red is another tool in their arsenal that will give them the winning edge. Whether on a Search and Recovery mission, quelling a disturbance, or jogging after work, you can guarantee that I want Sabre Red protecting me "All the way!"

Thank You for creating such an excellent, life-saving product.

Sergeant Shane Deaton
