Multiple Threats

Pepper Spray Launcher Home Defense Kit

11" (28 cm) L x 7" (18cm) H

Home intrusions can be very traumatic experiences, especially at night. In order to maximize safety during an intrusion, homeowners should put as much distance as possible between those threats and their families. Traditional pepper sprays and pepper gels provide great protection, but the SABRE Pepper Spray Launcher provides up to **150 additional feet of protection**. The additional distance, coupled with the **intense pain** caused by the projectile traveling at **330 feet per second**, increases the opportunity to both deter intruders and escape to safety. With a form factor designed for **speed, accuracy, distance, increased incapacitation and multiple threats**, the SABRE Pepper Spray Launcher takes home defense to the next level!

Home Defense Pepper Gel

Specifically designed for indoor use, the Home Defense Pepper Gel does not atomize in the air like traditional pepper spray so it won't spread through the HVAC system. It provides an 18' (5.5 m) range and 18 bursts for protection at a safe distance against multiple threats while the glow-in-the-dark safety makes it easy to find at night. The pistol grip provides easy to use handling and the wall mount allows for immediate access.
